REMARKS

## SOURCE

1. A landing field, about 1,000 feet square, was observed north of FINOW (N 53/V 08) (see annex).

25X1

  The factory buildings in the background  
  are a dismantled brass factory.

2. Eleven biplanes were parked in the open. According to local residents, they have been stationed there since 18 September 1949.

  Comment:

This is the first information on the existence of the landing field. According to previous reports, the brass factory building near the field was allegedly occupied by a tank unit, probably a repair unit. It is assumed that the observed PO-2s were courier or liaison aircraft assigned to this army unit.

2 Annexes: 1. FINOW landing field
